COVID - 19 Response

The discovery of COVID-19 and subsequent global pandemic has impacted communities, business and trade globally, including Papua New Guinea.

COVID-19 has continued to evolve and has created new challenges for governments, businesses, and families throughout Papua New Guinea. Whilst the current health pandemic may not be permanent, it still creates new economic, social, and political challenges that must be overcome.

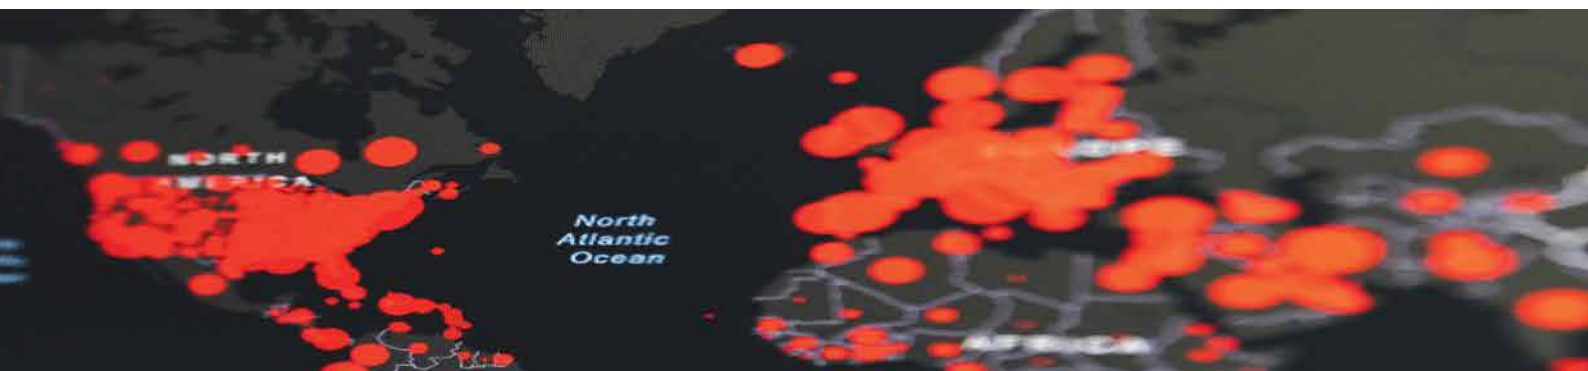

Connection Group has committed to the continuation of services and support in Papua New Guinea through these challenging times, whilst maintaining safety. The safety of our staff, contractors, clients, and communities is paramount to our success, which is why we follow the advice of health authorities, the World Health Organisation, Governments, and our clients to tailor solutions that allow us to operate in the safest possible way.

Papua New Guinea continues to develop throughout the global pandemic and Connection Group has partnered with clients to ensure there is no disruption to services available now, and into the future.

PNG after COVID-19

During the pandemic travel restrictions forced many businesses to utilise a local workforce to ensure business operations continued. Many PNG staff were asked to perform roles, previously held by FIFO workers, with no warning and minimal training. The PNG workforce was successful in maintaining business operations with less support and fewer staff. Connection Group not only applauds the efforts of the PNG workforce but supports the upskilling and training of workers throughout the pandemic and long into the future.

Congratulations to Papua New Guinea for rising to the challenge of a global pandemic.

Introduction

Connection Group PNG was established with a vision to provide quality solutions and support to companies and communities throughout Papua New Guinea. Through experience and strong relationships, Connection Group has the capacity to deliver innovative solutions for projects in PNG across multiple industries.

We can complement current and future projects whilst maintaining quality service and support to customers in Mining, Oil & Gas, Construction and Supply and Logistics operations.

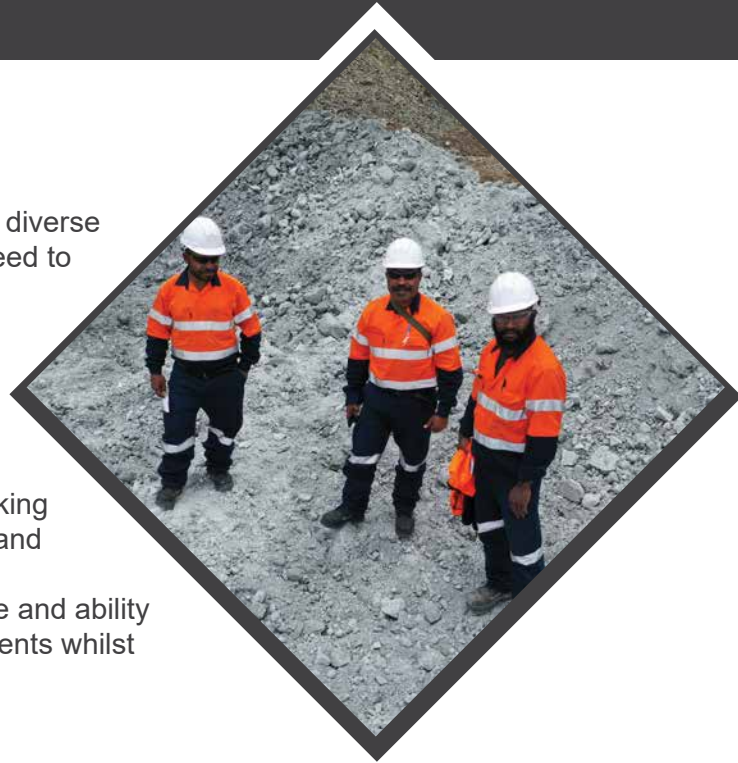

Connection Group maintains its commitment to the ongoing development of Papua New Guinea through training, product development and support services that have been previously unavailable in country.

Our Workforce

The Connection Group Team consists of professionals from diverse industries to provide the quality of service that customers need to deliver on project constraints.

Our management team have a combined 15yrs experience working on large scale projects in country such as, Manus Island (MOPC) construction, training and construction within the Mining and Oil & Gas industries,

Our expatriate teams are experienced and familiar with working in Papua New Guinea and the South Pacific in challenging and remote locations. Our national team have multiple years of experience in their fields and are chosen for their knowledge and ability to adapt to different working environments to support our clients whilst providing training to support the local workforce.

Community Engagement

"Connection Group is utilising innovative ways of interacting with local communities."

Papua New Guinea is a diverse country, rich in cultural history. While we are committed to upskilling the local population, and developing new products and services, we are always striving to maintain the cultural heritage of the country. This poses new challenges for the group and with the help of the local community, Connection Group is integrating services and promoting the rich history of Papua New Guinea. We constantly strive to engage with the communities in which we work using social media, this allows us to prioritise and tailor our services to best suit PNG and the needs of the people.

Connection Group is proud to be a supplier of choice in Papua New Guinea and partner with local land owner groups to achieve the best mutual outcomes for all.

Service Quality

Connection Group strives to maintain and deliver best in class services to customers and their operations. Through providing quality services, training and support, Connection Group can help clients deliver projects on time and within budget. Our industry experience and close working relationships with suppliers ensures that the best possible solutions are delivered to Papua New Guinea and helps to support local communities.

Training

Connection Group is highly experienced in offering training services in PNG to support and upskill staff and to provide technical support for clients. With some of the most experienced mining and High Risk trainers in PNG, Connection Group brings hands-on experience and innovative training skills to the learning process, ensuring we are leading training solution provider in Papua New Guinea.

Our training team consists of experienced expatriate and national trainers with multiple years of experience in training and assessment in Papua New Guinea and Australia. Connection Group also have the capacity to offer VOC (verification of competency) services to the Mining, Oil & Gas, and Construction industries. Our team of trainers hold qualification across multiple disciplines allowing Connection Group to tailor specified training to meet our customers' demands.

In addition to High Risk training, Connection Group offers Civil and Mining training and assessment services including VOC. Our team of trainers is qualified and experienced in Mining and Civil Construction and can help train and upskill new and experienced operators to ensure compliance with industry best practice. Connection Group can also offer training Audits and tailored training services specific to clients or projects.

Construction

Connection Group provides skilled personnel and support services for civil, mechanical, structural, electrical and mining construction projects.

With our in-house capabilities and network of associates Connection Group can quickly assemble and position specialist teams with the support services and equipment needed to meet your infrastructure and development requirements. These teams can range from skilled trades and operations staff through to project managers, construction managers and engineers.

With support from our partners, we can provide skills, services, equipment and support to a range of construction projects including:

- Roads and Road Maintenance
- Civil construction services
- General Construction
- Storage facilities
- Earthworks
- Mining construction services

Project management

Connection Group provides project management services as a direct service to clients or through project teams delivering project support on site. We service projects in the mining and construction industries and can support the delivery of projects ranging from small to large scale. Our approach is based on industry best practice and accepted project management methodologies to deliver proven results.

With experienced project managers and supervisors, we work with our clients to ensure projects are running efficiently and ensure all stakeholders are informed with regular reporting. Our Project management teams can assist in project research, consulting, delivery and engineering. Ensuring our client's success is paramount to Connection Group and our operations, as such, our team constantly undertakes training to ensure our clients receive the best solutions and support.

- Reviewing and managing development requirements and scope
- Monitoring requirements against deliverables during the course of a project
- Managing and reporting progress against project schedules
- Managing budgets to prevent budget overruns
- Managing development of teams, time and assignments
- Assigning tasks
- Allocating and planning resources and equipment
- Manage stakeholders
